

Devesh Tripathi

Full-Stack MERN Developer

+91-8112944825 | deveshbiksi@gmail.com | Open to Relocation: Delhi NCR (Noida, Gurugram), Pune, Bengaluru
LinkedIn: idevesh-tripathi | GitHub: ideveshtripathii | Portfolio: deveshtripathi-portfolio.vercel.app

PROFESSIONAL SUMMARY

Full-Stack MERN Developer experienced in building production-grade web applications with React.js, Node.js, Express.js, MongoDB, and TypeScript. Skilled in designing secure RESTful APIs, scalable backend architecture, and AI-powered features, with a strong focus on performance, reliability, and clean, maintainable code.

EXPERIENCE

Navigant Technologies

Delhi

Web Developer Intern

June 2026 – Present

- Built and maintained enterprise web applications using React.js, Node.js, Express.js, TypeScript, and MongoDB.
- Designed and integrated RESTful APIs, optimizing database operations to ensure reliable, consistent data flow.
- Diagnosed and resolved frontend, backend, API, and database issues through root-cause debugging, improving application stability.
- Conducted functional and end-to-end testing to validate features and maintain production-ready code quality.
- Deployed and monitored production releases via Hostinger cPanel, ensuring consistent application availability.
- Partnered with cross-functional teams using Git/GitHub for code review, version control, and continuous feature delivery.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, Java
Frontend:	React.js, HTML5, CSS3, Tailwind CSS, React Router, Context API
Backend & Database:	Node.js, Express.js, RESTful APIs, Socket.io, JWT Authentication, MVC Architecture, MongoDB, Mongoose, Redis
Tools & Technologies:	Git, GitHub, Postman, Vercel, Hostinger cPanel, Clerk, Gemini API, Stripe API, Cloudinary, Svox Webhooks, Sentry
Core Concepts:	Object-Oriented Programming (OOP), Problem Solving, Database Design, Performance Optimization

PROJECTS

PromptStack – AI SaaS Platform

React.js • Node.js • Express.js • MongoDB • TypeScript • Socket.io • Redis • Stripe • Gemini API

[Live Demo](#) | [GitHub](#)

- Engineered a production-grade AI SaaS platform delivering real-time conversational AI, image generation, and JWT-based authentication on a React.js, Node.js, Express.js, and MongoDB stack.
- Built real-time AI response streaming with Socket.io and Redis caching, powering context-aware conversations via Gemini 2.5 Flash for a fast, low-latency chat experience.
- Implemented a credit-based payment system with Stripe Checkout and Svox webhooks, and integrated ImageKit for AI-generated image hosting within an MVC backend architecture.

InsiderJobs – AI Job Portal

React.js • Node.js • Express.js • MongoDB • TypeScript • Redis • Clerk • Gemini API

[Live Demo](#) | [GitHub](#)

- Built a full-stack MERN job portal with role-based access control (RBAC), enabling recruiters and job seekers to manage postings, applications, and recruitment workflows.
- Integrated Gemini AI to power an AI resume parser and mock interview simulator with speech-to-text support, automating resume analysis and role-specific interview generation.
- Improved backend performance with Upstash Redis caching, integrated Clerk authentication via Svox webhooks, and added Cloudinary media storage and Sentry error monitoring for production reliability.

EDUCATION

Babu Banarasi Das University, Lucknow

2024 – 2026 (Completed)

Master of Computer Applications (MCA)

- SGPA: 8.0

Microtek College, Varanasi

2021 – 2024

Bachelor of Computer Applications (BCA)

- Percentage: 75%

CERTIFICATIONS

- 100xDevs Cohort 3 – Full Stack Web Development** (July 2024): Completed hands-on training in full-stack application development using modern JavaScript, React.js, Node.js, backend architecture, REST APIs, database management, and scalable web applications.
