Devesh Tripathi

AI Full-Stack MERN Developer | React.js | Node.js | MongoDB | TypeScript | Redis | Real-Time Applications | MCA'26
Noida, Uttar Pradesh, India

Summary

I am a Full-Stack MERN Developer and MCA candidate (Class of 2026) passionate about building scalable web applications and AI-powered solutions. I enjoy creating products that combine modern web technologies with intelligent automation to solve real-world problems. My technical expertise includes React.js, Node.js, Express.js, MongoDB, TypeScript, JavaScript, REST APIs, Socket.io, Redis, JWT Authentication, Stripe Integration, Cloudinary, ImageKit, and Git/GitHub. I also have hands-on experience integrating AI capabilities using Gemini API, Vector Embeddings, and LLM-powered workflows. I have built several production-grade projects, including: PromptStack – An AI SaaS platform featuring real-time communication, AI chat, Redis caching, Stripe payments, and scalable backend architecture. InsiderJobs – A full-stack job portal with role-based authentication, optimized MongoDB performance, recruiter dashboards, and application management workflows. WeatherScope – A real-time weather analytics dashboard with historical data visualization and responsive user experience. I am particularly interested in: • AI-Powered Web Applications • Full-Stack MERN Development • Backend Engineering & API Design • Real-Time Systems & Performance Optimization • Automation Tools & Intelligent Workflows I continuously focus on improving my development skills, learning modern technologies, and building impactful products that deliver exceptional user experiences. Open to Software Developer, Full-Stack Developer, Backend Developer, and AI Engineer opportunities. Let's connect and build innovative solutions together.

Education

BBD University

Master of Computer Applications - MCA · (September 2024 - May 2026)

Microtek College of Management & Technology
