

DEVESH TRIPATHI

Full Stack MERN Developer

+91-8112944825 • deveshbiksi@gmail.com • [LinkedIn](#) • [GitHub](#) • Open to Relocation • Available: May 2026

PROFESSIONAL SUMMARY

MCA candidate (May 2026) and Full Stack MERN Developer with experience building scalable SaaS applications, real-time systems, and RESTful APIs. Developed PromptStack, an AI platform supporting 100+ concurrent users using WebSockets, Redis caching, and Stripe integration. Built InsiderJobs, improving database performance by 30% through MongoDB optimization. Proficient in React, Node.js, Express, MongoDB, and TypeScript, with a strong focus on backend development and system design.

PROJECTS

PromptStack — AI SaaS & Image Generation Platform | [Live Demo](#) | [GitHub](#)

React 19, Node.js, Express, MongoDB, Socket.io, Stripe, Redis, Gemini API, ImageKit

- Built a scalable AI SaaS platform supporting 100+ users using WebSockets, Redis, and event-driven architecture
- Implemented real-time response streaming (Socket.io) achieving sub-100ms latency
- Developed context-aware chat system with MongoDB and vector embeddings for multi-turn interactions
- Integrated Stripe-based credit system with secure webhook handling for automated billing

InsiderJobs — Full Stack Job Portal | [Live Demo](#) | [GitHub](#)

React, Node.js, Express, MongoDB, TypeScript, Clerk, Cloudinary

- Developed a scalable full-stack job portal with role-based access control (RBAC) and RESTful APIs supporting complete CRUD operations
- Optimized backend performance by implementing MongoDB indexing and query optimization, reducing response time by ~30%
- Integrated Clerk authentication with secure session management and Cloudinary for efficient file and media storage
- Designed and implemented recruiter and user dashboards for job management, application tracking, and status workflows

WeatherScope — Real-time Weather Dashboard | [Live Demo](#) | [GitHub](#)

React, Vite, Tailwind CSS, Open-Meteo API

- Built a high-performance weather dashboard with geolocation-based data fetching, achieving sub-500ms rendering speed
- Implemented 2-year historical weather analytics with optimized API orchestration and interactive visualizations using Recharts
- Designed a responsive UI with dynamic data handling, including real-time weather metrics and efficient state management

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java

Frontend: React.js, Vite, Tailwind CSS, Context API

Backend: Node.js, Express.js, REST APIs, MVC

Databases: MongoDB, Mongoose, Indexing

Real-Time & Performance: WebSockets (Socket.io), Redis, API Optimization

Authentication & Security: JWT, bcryptjs, Clerk, RBAC

Cloud & Integrations: Stripe, Webhooks (Svix), ImageKit, Cloudinary

AI & Advanced: Vector Embeddings, LLM Integration (Gemini API)

Tools: Git, GitHub, Postman, Vercel | **Core Concepts:** DBMS, Data Structures & Algorithms, Problem Solving

EDUCATION

Master of Computer Applications (MCA) — Babu Banarasi Das University, Lucknow | SGPA: 8.0 | May 2026

Bachelor of Computer Applications (BCA) — Microtek College, Varanasi | 75% | Jul 2021 – May 2024

CERTIFICATIONS & TRAINING

100xDevs Cohort 3 — Full Stack Web Development (July 2024) Intensive program covering JavaScript, Node.js, REST API design, authentication (JWT, bcryptjs), Stripe payments, WebSocket real-time communication, MongoDB design, Redis caching, and Vercel deployment. Completed 3+ production-ready projects with hands-on experience in scalable architecture and DevOps.
